# Chapter 1

## Introduction

### 1.1 Background

Two of the most common machine learning tasks:

- Classification: The computer is asked to specify which category a certain input belongs to.
- asdfsdf

[1] Something that [2]

### 1.2 Objective

The objective is to determine if a road surface temperature sensor can be simulated with prediction models based on data from road weather information systems.

### 1.3 Scope

### 1.4 Thesis structure

## Chapter 2

# Literature Review

Write about literature regarding methods used.

### 2.1 Neural networks

## Chapter 3

# Method

Describe what methods are used to carry out the research. Describe that either several machine learning models are used and compared or one is used and the work is to improve it etc.

3.1 Research purpose

3.2 Research approach

3.3 Research strategy

3.4 Tools

## Chapter 4

# Implementation and results

Describe the process of collecting data, training and implementing machine learning algorithms with different methods.

### 4.1 Data collection

### 4.2 Neural network

#### 4.2.1 First iteration

#### 4.2.2 Second iteration

## Chapter 5

# Conclusions and recommendations

### 5.1 Conclusions

### 5.2 Recommendations

## Chapter 6

# Discussion

### 6.1 Thesis process

### 6.2 Validity and reliability

Validity and reliability of the conclusions. Needed?

### 6.3 Future work
